#### Synopsis

Relating literature and handicrafts, the program "Words Made By Hand" (Palavra Feita à Mão) proposes thematic pathways through the collections and spaces of the Biblioteca Mário de Andrade, followed by practical proposals with invited artists and collectives.

With the objective of fostering access to the diversity of the Library's collection, each month selected titles are highlighted based on research shared between the Educational Center and guests. The experience with the books inspires the collective moment of creation.

In April, in the second edition of the program, a visit will be held to the exhibition "The machine Room" (Sala de Máquinas, by André Azevedo, followed by the Library's collections, highlighting references of the artist, such as Stéphane Mallarmé, Augusto de Campos and Haroldo de Campos. At the end, a collective writing action will be proposed based on the poem "A Throw of the Dice Will Never Abolish Chance," by Stéphane Mallarmé. The words are typed in real time, forming a continuous text throughout the activity, built by the sequence of choices and by chance. (Global Goal 4 - Quality of Education)
